

speed, precision and efficiency

Looking for quick change?

Zero point mounting systems revolutionise set-up times and keep downtime to a minimum. The Stark systems from Roemheld combine high accuracy with ease of use across a wide range of applications, including vertical and horizontal machining.

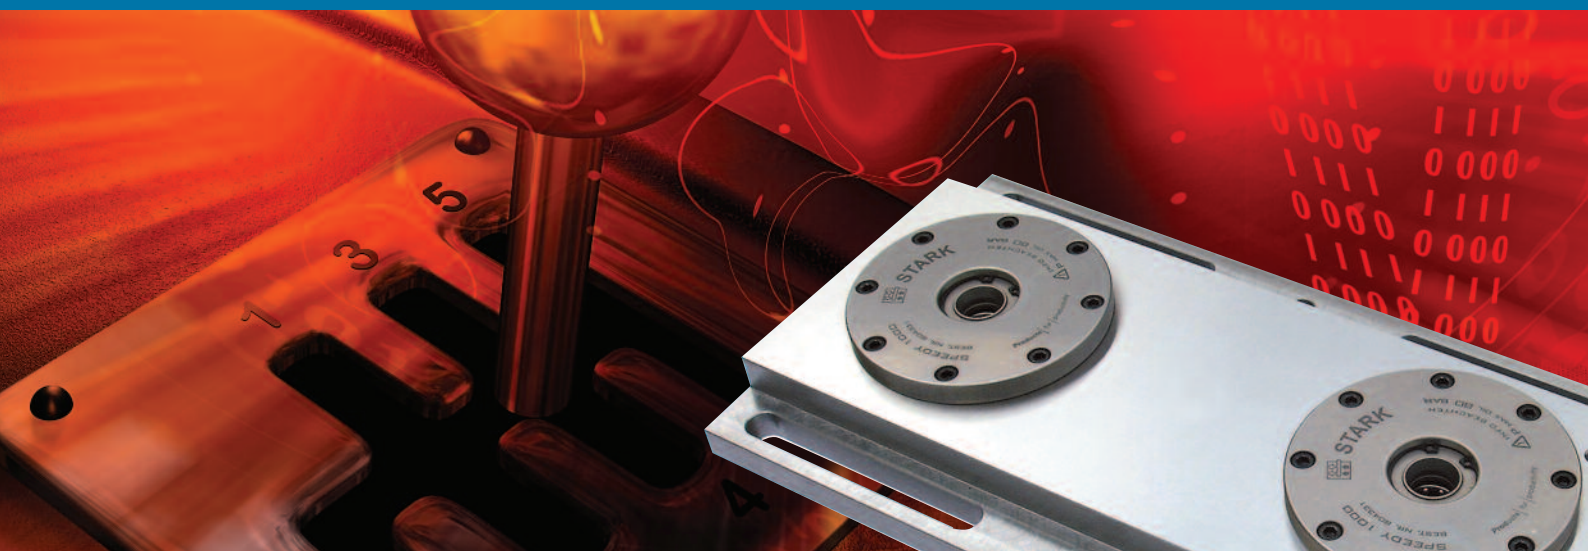

The compact construction of the Roemheld zero point mounting elements mean they can be fitted to fixtures or cubes as well as attached directly to the machine table.

Benefits include:

- High accuracy and repeatability
- Compact construction
- Optimised set-up times
- Reduced machine downtime
- Modular design for customised solutions

Get the benefits faster with AC Hydraulics

For complete service, sales, systems and capability

AC Hydraulics Limited

As well as offering customers an extensive range of products, AC Hydraulics also design and build hydraulic and pneumatic control systems. We pride ourselves on delivering technical expertise and product support that competitors find hard to match.

Wide range of products

AC Hydraulics has a portfolio of products that is second to none. All our main lines are world leading products and this ensures we keep up-to-date with the latest product innovations and applications.

Hydraulic and Pneumatic Expertise

Few companies have the ability to design and build systems with both hydraulic and pneumatic disciplines on the same project. We offer electrical control as a package however pneumatic control on a hydraulic system can prove a simpler and more cost-effective solution.

Commitment to service

Our reputation is based on our commitment to service, backed by unrivalled expertise and experience. We pride ourselves on offering a service which is constantly updated but stays flexible to meet your changing needs.

Technical support

Our experienced technical representatives are always on the move and happy to provide any technical solutions and practical help you may require at your premises.
