

Pressure screws, stainless steel

Material:

Screw in stainless steel.
Bolts, brass or POM.

Surface finish:

Screw natural finish.

Sample order:

nIm 07119-041X105
(Please also indicate dimension L.)

Note:

Screws are especially suitable for protective clamping or pressing of threaded spindles, axles, shafts and surface-processing parts. Further lengths have been designed especially so that pressure screws can be glued up. They allow mechanical connecting elements with external thread to be made cost-effectively for small and medium-sized series.
